

Installation instructions

Tips

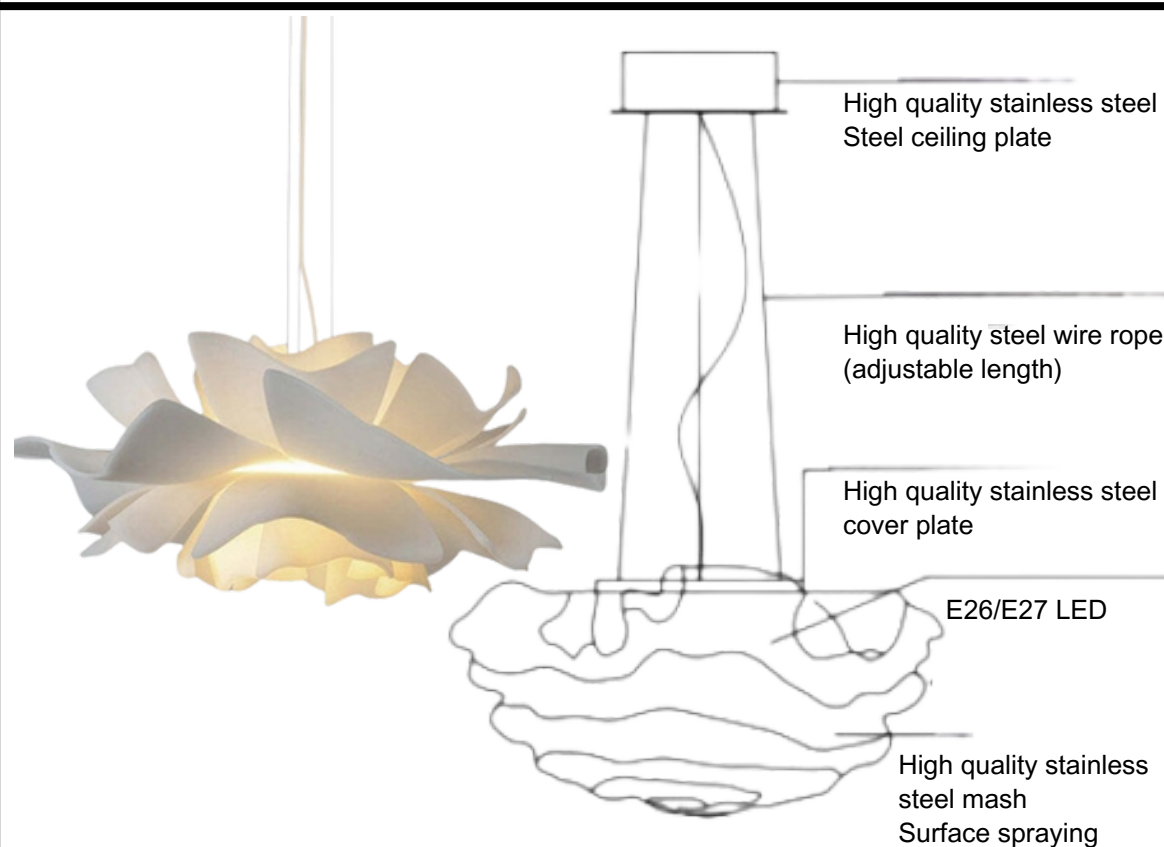

1. Test the power before installation, and then install it after the light is on.
2. Please install it in strict accordance with the instructions. Do not modify the lamp structure at will, and do not replace components. If it is not installed properly, it is very likely to damage the product and cause safety accidents.

Be careful:

1. To ensure correct installation, please assign professional personnel to install, inspect and repair
2. Do not use the power supply beyond the regulations (AC 110V-240V-50HZ). Do not use it in wet places such as bathrooms.
3. It cannot be installed next to furnace gas pipe and inflammables and explosives
4. It cannot be used with the dimming controller to avoid failure.
5. When the lamp is abnormal, the power supply should be cut off immediately and the local dealer should be contacted in time.
6. The lamp model must be provided during maintenance

Instructions

- Please read the installation instructions carefully before installing. Please disconnect the power supply before installation.
- Please wear gloves during installation to prevent metal parts, acrylic and lampshade from being affected by hand prints, when cleaning, please use designated items for scrubbing, stainless steel with wax, lampshade with water glass, acrylic with brush. It cannot be installed on the wet ceiling.

IMPORTANT SAFETY INSTRUCTIONS

1. Never fit bulbs of higher wattage than those specified on the label.
2. Clean with soft, dry cloth
3. Always avoid the use of harsh chemicals or abrasive cleaners as they may cause damage to the lamp
