1. Use a screwdriver to take out Hanging plate screws, then take out the hanging plate.

2. According to the hanging plate size, drill two holes on the correct position near the wall wire, set plugs the gecko into holes, then fix the hanging plate by screws to the wall.

3.With a screwdriver installed by the screw through the hanging plate hole into the gecko, make the hanging plate fixed to the wall

4. connect the two wires of the lamp to the power supply and do insulation treatment (there is no positive and negative pole), insert the screw through the hole in the lamp body and attach the lamp body to the hanging plate.
